

Data sheet EN INTEGRA-pw 2.5-1143

INTEGRA-pw safety barrier

Technical data:

Element height: 1143 mm
 Mesh size: 50 x 100/200 mm
 Max. element width: 5506 mm

Manufactured in grids of 50 mm
 Material: S235 steel
 Fastening flange made of S355

Surface: Hot-dip galvanised in accordance with DIN EN ISO 1461
 Optional: Powder-coated

Verification of stability as a safety barrier in multi-storey car parks for car impact

- up to 2.5 t and 10 km/h in accordance with EN 1991-1-7
- up to 2.5 t and 10 km/h in accordance with SIA 261.007
- up to 2.5 t and 4.5 m/s in accordance with EN 1991-1-1, Annex B or BS 6399-1

Verification of stability for pedestrian fall protection with guardrail loads

- up to 1.5 kN/m in accordance with NA to BS EN 1991-1-1
- up to 1.0 kN/m according to EN 1991-1-1
